

BAURAL

SF1200 Silager

HIGH-TECH MACHINES FOR AGRONOMIC
RESEARCH AND SEED PRODUCTION

Harvesters

Comfort and functionnality

A simple plot and multi-varieties silager designed to meet your needs

Completely suited and developed by BAURAL
Efficient and robust design
Adaptable on every tractor
Fast row-edging
Quick silage and cleaning avoiding mixture
Efficient header and chopper
Storage hopper with large floor conveyor
Daily reduced maintenance
Transport as normalized size

Corn header

Champion 1200 KEMPER
Row spacing for corn at 70 to 80 cm
2 intake drums
2 pressure rollers
Foldable chute for transport
Rotating chute from the tractor
Tilting chute extension from the tractor
Lateral auger (optional)
Foldable header at the tractor's back for a transport on road
Easy and efficient blades sharpening system
Hydraulic exchange for trailer enslavement

Specialized trailer

Telescopic coupling allow the trailer to be :

Clustered : harvest

Hydraulic stand with manual pump for a quick disassembly

Large tyres and solid frame
11,5 / 80 x 15,3

Apart : transport

« Push-Pull » coupler for a quick connection of the hydraulic system

Traffic lights to drive on roads

Weighing and sampling equipment

Silage recovery and weighing

Foldable cyclone with large funnel

Weighing hopper of 500 liters

Weighing area with 4 stainless-steel sensors (500 kg maxi)

Weighing indicator with quick stability

Printer (for weight information summary)

Access and control from driver's seat

Pneumatic system for door opening

Transfert hopper and sampling

Transfer hopper with endless screw for a quick discharge toward the storage hopper

Stirrer with blades on the hopper's bottom

Sampling screw with adjustable speed, equipped with inverters for direction of rotation

Sampling storage tank with an outside access

Storage hopper

Floor conveyor with chains and bars

Hydraulic functioning

Double watertightness bottom with cleaning trapdoor

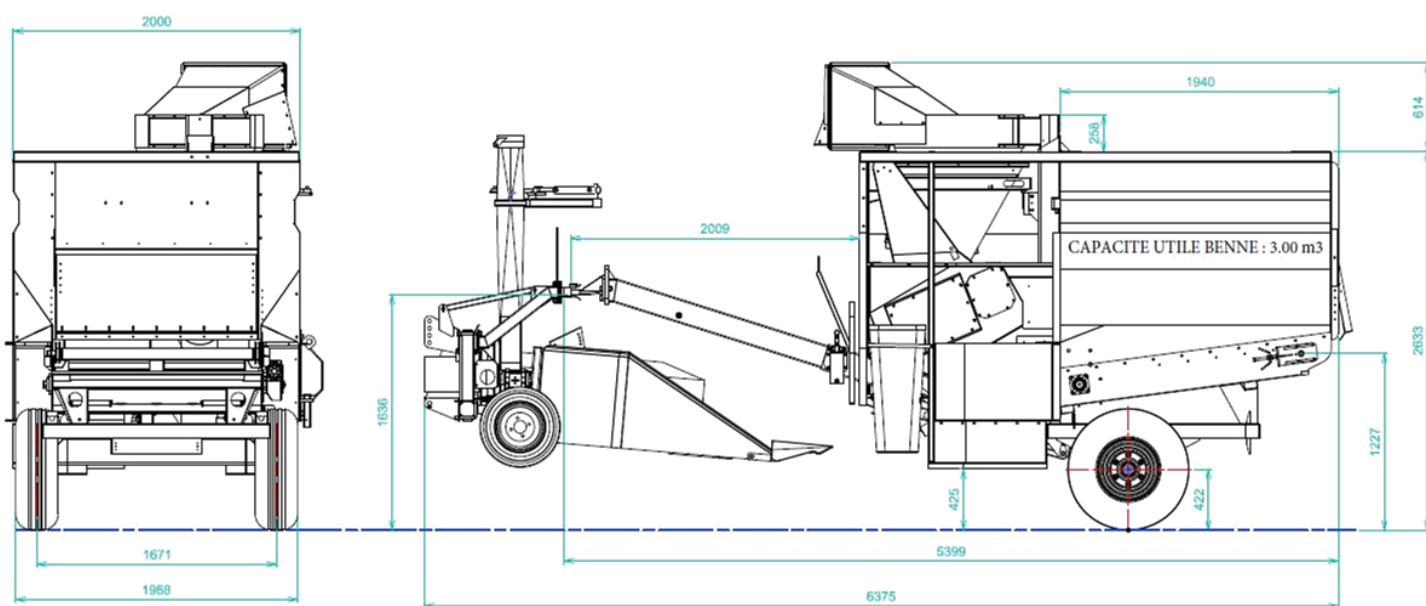

Large hopper (3.5 m3)
